# PLAYTIME!

Learning Through Play

## BabyPlay! For Babies 7-15 mths

During this period, baby's growth accelerates. His increasing cognitive development results in inquisitiveness and emerging self-awareness. Critical to his first learning experience is the opportunity to explore and express.

**Baby Play!** provides stimulating activities for both babies and parents through:

- yoga play • toy play • simple sign language
- fun tools to capitalize on this vital development stage • exercises with songs and rhymes

The above endows you with the tools to promote learning potentials and holistic development of your babies

**Class Structure:** 15 mins of easy-going toy play session as a warm up session for babies. 30 mins of gentle yoga play, positive affirmation circle, sign language, musical moments, dances and goodbye!

## Positive Play For Toddlers 16-30 mths

At this stage, Toddlers' emerging curiosity and the need to move, to explore objects, sounds and other external stimuli are critical to their development. This is also the stage where toddlers are beginning to communicate with the outside world through the use of elementary vocabulary and sign language.

**Positive Play** provides stimulating activities for both babies and parents through:

- yoga play • imaginative story telling or arts and crafts • Phonics - Single sounds
- positive discipline (understanding and appreciating boundaries)
- expressive communication through postures/movements/body language/facial expressions

**Class Structure:** 15 mins of easy-going toy play session. 30 mins of yoga play, positive affirmation circle, arts and crafts or interactive story telling, sign language, musical movements, dances and goodbye!
